About me

Motivated Computer Science undergraduate seeking a software engineering internship to apply expertise in full-stack development, data structures, and AI-driven systems. Passionate about building scalable, high-impact applications and contributing to real-world engineering challenges.

EDUCATION

Bhagwan Parshuram Institute of Technology

Bachelor of Technology in Computer Science Engineering

CGPA – 8.6

Delhi

2024-2028

LEADERSHIP / ACHIEVEMENTS

- Solved 400+ Data Structures & Algorithms problems on LeetCode, demonstrating strong algorithmic thinking and consistent problem-solving discipline.
- Secured Top 5 ranking (out of 400+ teams) at Brewing Codes 4.0 Hackathon, delivering a collaborative solution under competitive conditions.
- Qualified Smart India Hackathon (SIH) at the university level, advancing among 170+ competing teams with an innovative technical solution.
- Served as Junior Council Member at Anveshan Technical Community organized and coordinated 5+ technical events, fostering peer learning across 200+ students.

PROJECTS

CLOUDWISE AI: AI-Powered Cloud Cost Optimization Platform

Next.js, FastAPI, SQL, Multi-AI agent, REST APIs

- Engineered an AI-driven SaaS platform enabling startups to monitor and optimize cloud infrastructure costs in real time, reducing average cloud spend by an estimated 20-30%.
- Designed a multi-agent system to analyze AWS EC2, GCP, and Azure usage patterns, surfacing actionable cost-saving recommendations such as instance resizing, scheduling, and unused resource detection.
- Built an interactive Next.js dashboard with dynamic cost breakdowns and optimization visualizations, improving decision-making speed for non-technical stakeholders.
- Architected RESTful APIs using FastAPI to enable seamless, low-latency communication between the frontend, backend, and cloud provider services.

ORACLE360: Unified Customer Review Intelligence Platform

Next.js, Node.js, MongoDB, APIs, NLP (Sentiment Analysis)

- Developed a centralized intelligence platform aggregating and analyzing customer reviews from 5+ sources including Zomato, Swiggy, Google Maps, and social media APIs.
- Built robust ETL pipelines to fetch, normalize, and deduplicate review data from external APIs and web sources, processing 10,000+ reviews in early testing.
- Implemented NLP-based sentiment analysis classifying reviews into actionable business insights, achieving ~85% classification accuracy.
- Enabled businesses to identify product pain points and improve decision-making through automated, data-driven insight reports.

TECHNICAL SKILLS

Languages: Java, Python, C/C++, SQL (Postgres), JavaScript, Typescript

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, FastAPI

Developer Tools: Git, GitHub, VS Code, REST APIs, WebSockets, Postman

Database: MongoDB, SQL

Core Concepts: Data Structures & Algorithms, OOPs, DBMS, Operating Systems
